

John Doe  
Staff Software Engineer  
johndoe@example.com | (123) 456-7890

## Summary

Experienced software engineer with a strong background in full-stack web development and a passion for creating scalable, reliable, and user-friendly software. Skilled in modern programming languages and frameworks, such as Ruby, Rails, JavaScript, and React. Proven track record of delivering high-quality software on time and on budget.

## Skills

- Full-stack web development
- Ruby, Rails, JavaScript, React
- Agile software development
- Test-driven development
- RESTful APIs
- Cloud computing (AWS)
- Git, GitHub

## Experience

Staff Software Engineer  
ABC Company | January 2020 - Present

- Led the development of a new customer-facing web application, using Ruby on Rails and React, which increased user engagement by 50% and reduced server-side rendering time by 75%.
- Implemented test-driven development and continuous integration practices, resulting in a 30% reduction in defects and a 50% improvement in code coverage.
- Mentored junior software engineers and contributed to the development of the company's software engineering best practices.

Senior Software Engineer  
XYZ Company | May 2017 - December 2019

- Designed and implemented a microservice-based architecture, using Ruby and AWS Lambda, that significantly improved the reliability and scalability of the company's flagship product.
- Developed and maintained RESTful APIs that enabled the integration of the company's products with third-party services.
- Contributed to the development of the company's internal tools and processes, including the implementation of a new continuous delivery pipeline.

## Education

Bachelor of Science in Computer Science  
University of Technology | September 2013 - June 2017
